District: Leadville
Location: Washoe County
Au/Ag ratio: 1/900
Chief ore minerals: Galena, sphalerite, pyrite, chalcocite

Rare or unusual minerals

Gangue minerals: Quartz, calcite

Host rock: Andesite, dacite flows, dikes
Alteration: phyllitic, argillic, potassic, propylitic

Mineralization age: ~31 my.
Vertical range Au-Ag ore: >240 m.
Production: 41,600 kg Ag, 412 kg Pb, 227 metric tons Pb, 46 metric tons Zn

Deposit type: Vein

Selected references: Bonham, H. F., 1967, Geology and mineral resources of Washoe and Storey Counties, Nevada: Nevada Bureau of Mines, Bull. 70

Comments: Veins contain abundant galena and sphalerite
Lead Zin Copper
