2780 0010	1 (iii)
PROPERTY NAME: Sample Sites 2966 and 2967	_ county: Humbolat Hem 19
OTHER NAMES:	Mining District: Leonard Creek
MINERAL COMMODITY(IES): Galena minor copper and Au, Ag.	AMS Sheet: Vya
TYPE OF DEPOSIT: Quartz Veins	Quad Sheet: Duffer Peak 15
ACCESSIBILITY: Very poor roads	Sec. 6, T, R
OWNERSHIP: Unknown but staked	Coordinate (UTM):
	North 4 6 0 6 0 0 0 m East 0 3 6 3 4 5 0 m
PRODUCTION: Unknown	
HISTORY:	Zone
DEVELOPMENT: Two adits on the NE side of the ridge. A were present but are no longer operatable.	A small mill and concentrator
ACTIVITY AT TIME OF EXAMINATION: None	
GEOLOGY: The mine workings are in a steel gray phyll	lite on the northeast side
of a steep ridge. The workings follow iron stained	d, brecciated vein systems
with highly irregualr dips and strikes. They are recommod to develop without dropping below the ridge.	relatively small with very
galena, copper and possible silver sulfides. Sample	= 2966
