

Item 3 2960 0003

Tompel Mary Co.
JUL 25 1912

ABSTRACT OF REPORT

(140)

Item 3

Country..... United States.....

State..... Nevada..... County..... Elko.....

Name of Mine..... SHERMAN (Buckeye Mining Company)

Kind of Deposit..... Vein in rhyolite

Valuable Metals..... Gold (with 2% silver)

Extent of Property..... 6 claims

Reported on by..... Chas. A. Liddell..... Date..... Not given

Financial Proposition:

Will lease

Mining proposition brought in by..... G. O. Torpy, Marietta, Ohio.

Abstract of Report: Date..... July 24, 1912 By..... J.R.S.

At Manhattan, 45 m. from Tonopah (nearest R.R. point).
2 m. NE. of town. Wagon road to within 2000' of property.
Water in well $\frac{1}{2}$ m. away. Elevation 1300' above Manhattan
and 9000' above sea. In rhyolite. Main development--Tunnel
#1, and shaft 100' deep--on Vein #1. Vein kaolinized fissure
in rhyolite. Values in chutes from small seam to 15"; ore
associated with hematite, pseudomorphic after pyrite. Tunnel
No. 1 shows 2000 tons \$15 ore in sight. Shaft No. 2
shows quartz, sv. %". Production about 70 tons \$40 ore. De-
velopment and mill needed.

COMMENT: Width too slight and values probably depend
largely upon surface enrichment. Not attractive.
