

2960 0036

PROPERTY NAME: Sample Site 2055

OTHER NAMES: Date Claims (?)

MINERAL COMMODITY(IES):

TYPE OF DEPOSIT: Silicified Volcanics

ACCESSIBILITY: Three miles from valley in Bald Mountain Canyon.

OWNERSHIP: Date Claims (?)

PRODUCTION: Unknown

HISTORY: Looks like the 1930's (?)

(240) Item 36

County: Nye

Mining District: Manhattan

AMS Sheet: Tonopah

Quad Sheet: Manhattan 7 1/2'

Sec. 5, T. 8N, R. 44E

Coordinate (UTM):

North 4, 2, 7, 0, 0, 0 m

East 0, 4, 9, 4, 2, 5 m

Zone

DEVELOPMENT: A series of shafts and prospects.

ACTIVITY AT TIME OF EXAMINATION: Drilling to the NW of the site.

GEOLOGY: The sample site is part of a small prospect in volcanics along an E W structure. The general area is currently being drilled and claims are being staked to the north of this site. Assay values from sample 2055 were low for most major elements.
