

3040 0001

Mellán Mountain district (Cornwall, 1972)

NE of 210

Item 7

The Mellán Mountain mining district covers a hill south of Mellán on the east side of Cactus Flat (T. 3 S., R. 48 E.). Deposits of gold and silver occur in shear zones in rhyolite and shale (Kral, 1951, p. 131-132). The deposits, known as the Mellán Gold Mines Group, are described in Appendix A, page 90.
