NYE COUNTY
GENERAL

Mine Mountain district (Cornwall, 1972)

Item 49

The Mine Mountain mining district occurs ~~on Mine Mountain~~ on the southwest margin of Yucca Flat (T. 11 S., R. 52 E.). Deposits containing lead, silver, and mercury occur in steep normal faults trending N. 30° E. in brecciated quartzite and silicified dolomite of the Devils Gate Limestone in the upper plate of a thrust fault (Harley Barnes and others, written commun., 1963). The Mine Mountain mine is described in Appendix A, page 91.
