History and production

The 17 claims in the group have been relocated by Edwin Marker, Lyle and Wayne Stoker, who have leased it to John Heizer. No production to date.

Type Deposit (Geology)

The outcrops show in knobs and small hills for a distance of over 1 mile and the ore may be continuous between these showings. The one to be about 60 feet wide on the outcrops. The presence of magnetite is indicated by strong response in the magnetometer. About 4 million tons of magnetite ore are indicated on this property. ~~XXXXXXXXXXXXXXXXXXXX~~
~~XXXXXXXXXXXXXXXXXXXX~~

Mine Workings Only a small amount of trenching for exploration has been done.
