a. Morey district, Nye County, Nevada.

b. Geographic coordinates: 38°40' N., 116°15' W.

c. Status of exploitation: Discovered in 1865; small but consistent
   recorded production 1867-1891 worth $415,662. 1937 to 1948
   production amounted to $59,455. Values in ore chiefly silver.

d. References: Kral, V. E., 1951.

e. Adequacy of our present knowledge: ?

f. Topographic coverage: ?

g. Major mineralologic and geologic features: Veins in porphyritic quartz-
   latite. Rhodochrosite pyrite, quartz and silver minerals (andorite -
   a lead-silver-antimony sulfide), sphalerite.
Silver in the United States

(Data sheets for individual mining districts, prepared in conjunction with a metallogenic map for the 1960 International Geological Congress.)

Authorship:

E. T. McKnight - All districts west of the Mississippi River, except most of those silver-producing districts containing less than 1,000 tons of lead or zinc in the following states: Arizona, New Mexico, Nevada, Oregon and Washington. Also the following silver districts in 4 of the states mentioned: Vulture, and Helvetia, Ariz.; Ash Peak, Miami, Globe, Apache, Black Range, Chloride Flat, Georgetown and Lake Valley, New Mexico; Ashwood and Granite, Oregon; Deertrail, Reppas and Ruby-Concomully, Washington. White Pine district, Michigan.

A. V. Heyl, Jr. - All districts east of the Mississippi River (except White Pine, Mich.)

Harry Klemic and W. L. Newman - Silver districts not associated with lead or zinc, in Arizona, New Mexico, Nevada, Oregon, and Washington (except as listed above).
