

Item 8

NAME OF PROPERTY

Angelus Basic Copper Property - A. A. MacLean dba Angelus Basic Copper
Company, leaser
A. Lilja and L. Lilja - owners

LOCATION OF PROPERTY

T12N R28E

- SE

Northern Light Mining District, Mineral County, Nevada, 25 miles NE by dirt
road from Yerington, Nevada.

GEOLOGY

Open fracture in compact limestone formation with occasional cross fractures.
Vein averages 5 feet in width (dip 70°) and exhibits open water-course
structure with limonite filling. Copper minerals are chalcanthite, tenorite,
melanterite, and malachite. Enrichment appears weak.

DESCRIPTION OF PROPERTY

Property consists of 4 contiguous claims. Principal workings comprises 350 foot
incline shaft with 100 foot, 200 foot, 250 foot and 325 foot levels - accessible
to 250 foot level only. Two old inaccessible shafts (200 foot deep)
700 feet north and 1000 feet south of main shaft complete the workings.

PRESENT AND POTENTIAL ORE RESERVES

Present ore reserves estimated at 5000 tons of possible ore averaging 5% copper.
Potential reserves little or nothing.

ANYTHING ELSE RELATED TO THE PROPERTY ITSELF

U. S. B. M. partially sampled mine. Property formerly worked by Mason Valley
Mines Company.
