WP-14

East slope of Schall Creek Range, White Pine County, Nevada. 5 patented claims (No. 1733) in Secs. 8 & 17, T. 20 N., R. 66 E., on Muncie Creek. Elevation 8500 ft.

GEOLOGY

Massive limestone with fissures and old water courses filled with clayey matter, limonite, and lead and zinc carbonates. Lead & zinc ore occurs on walls of "water courses" which vary in widths, and meander considerably in strike and dip.

DEVELOPMENT

This is thru a 25 ft. crosscut tunnel, an incline raise, 20 ft. and 30 ft. vertical winze. About 100 ft. of drifts at top of raise. Zinc carbonate ore from 2 to 5 ft. wide occurs in varying quantities on hanging wall side of the main fissure. Average content 20% Zn. Lead ore occurs in somewhat lesser quantities on footwall side. Average content of better grades 30% with 8 to 10 oz. Ag.
