

3450 0008

(243) Item 8

PROPERTY NAME: Thiriot Property
 OTHER NAMES: Garnet Lode Claim Test Site No. M-7
 MINERAL COMMODITY(IES): Tungsten
 TYPE OF DEPOSIT: Contact
 ACCESSIBILITY: Good road to within 1/4 mile of the workings
 Access restricted by the N.T.S.
 OWNERSHIP: U.S. Government
 PRODUCTION: 125 units of WO_3 (1940) grade 0.3 percent WO_3
 HISTORY: See remarks below.

County: Nye
 Mining District: Oak Springs
 AMS Sheet: Goldfield
 Quad Sheet: Oak Springs 7 1/2'
 Sec. _____, T _____, R _____
 Coordinate (UTM):
 North 4 1 1 2 1 1 1 0 0 m
 East 0 5 8 1 4 1 6 1 0 m
 Zone _____

DEVELOPMENT: A 20 foot adit with a 20 foot west bearing drift and an open trench of another 20 feet in front of the portal.

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: The workings adjoin the southeast side of the Climax claims. The mine workings are north bearing 20 foot adit with a west bearing drift of another 20 feet. The mineralization looks to be low-grade scheelite and possible powellite which occurs as coarse flecks along seams in a reddish-brown garnet rich tactite with lesser quartz and calcite veins. Sample #1848 was selected from the dump and Sample #1924 was from the south wall in the west adit. These workings crosscut the eastern most part of the Broad Ledge vein system.

REMARKS: George Tamney and his father staked the NE portion of the Climax Stock in 1936 acting on information supplied by Wesley Koyen and George Thiriot. Apparently the Tamneys returned the favor by staking this less promising part of the tactite bodies on behalf of Thiriot and Koyen who in turn lessed it to Smith, Stolle, and Riley in 1940. The lessors built a small mill to the east and treated a small tonnage of ore from the Thiriot, Nevada-Massachusetts Co. and W. A. Smith Claims. The mill was dismantled in 1941.

REFERENCES: Houser F.C., Poole F. Prelim. Geologic Map of the Climax Stock 1960. Tungsten Deposits Near Oak Springs Nye County Nevada. D. G. Wyant 1941 Unpublished. Nevada Bureau of Mines Bull. Tungsten Deposits of Nevada. In preparation.

EXAMINER: Quade/Bentz

DATE VISITED: 12-8-82
