

PROPERTY NAME: Rainstorm prospect

COUNTY: Nye

OTHER NAMES: Sample site 1918

MINING DISTRICT: Oak Springs

MINERAL COMMODITY(IES): Pb, Ag, Au

AMS SHEET: Caliente

TYPE OF DEPOSIT: Vein

QUAD SHEET: Jangle Ridge

ACCESSIBILITY: Via Groom Lake road

SEC: 13 ,T: 09S ,R: 54E

OWNERSHIP:

COORDINATE (UTM):

PRODUCTION: Unknown

4112720  
NORTH: 4117750m:

0597410  
EAST: 0597350m:

ZONE: +11

HISTORY:

DEVELOPMENT: Small caved adit

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Brecciated white quartz vein, quartzite breccia, along N70W, 70 degree NE dipping fault. Vein structure cross-cut by a NS-striking, vertical fault zone; adit follows the NS structure. Some sulfides were noted in vein material found on the adit dump.

REMARKS: The area is within the Nellis Air Force Test Range, and is closed to mineral entry.
