82 Item 30

Mine Name: Crystal claims

MILS Sequence No.: 3202300011

Location: Sec. 19, T 8 S, R 53 E

County: Nye

Commodity: Tungsten, Gold

Production: Kral (4) reported that several tons of ore were milled; however, the tungsten content was not known.

Mining District: Oak Spring

Geology: Scheelite occurs in shear zones in limestone.

Development: The workings consist of a 30-foot shaft with 20 feet of laterals; a 70-foot shaft connected with a 150-foot adit, and many trenches.

Period of Activity: Unknown, but some workings appear to be the result of early gold prospecting around the turn of the century. Other workings are the result of tungsten mining prior to World War II.
