

3630 0007

PROPERTY NAME: Diamond Treasure Hill Leach Operation
 OTHER NAMES: Silverado Mill (when under Gold Creek Corp)
 MINERAL COMMODITY(IES): Ag, Au
 TYPE OF DEPOSIT: Leach pads

ACCESSIBILITY: _____

OWNERSHIP: Diamond Treasure Hill Inc., Las Vegas (owned by Galli(?) Mining Co.) ran leach operation SSHK, Las Vegas
~~XXXXXXXX~~ (702) 362-7313 bought operation from E. Erickson 6 mos.
~~XXXXXXXX~~ ago Russ Horton from Ely was in charge at time of examination. He was unclear about who owned the operation. However, he mentioned that SSHK bought out Gold Creek Mining & was currently drilling at Hamilton.

DEVELOPMENT: There are a total of 6 leach pads on property, but only 4 were being used. A 1 million gallon fresh water pond is nearby. Several trailers & buildings are on property.

ACTIVITY AT TIME OF EXAMINATION: Leaching ore.

GEOLOGY: The ore they were leaching at the time of examination came from several sources. One large pile came from the Bay State Mine in the Newark District to the north. Russ Horton informed us that the ore was taken directly from the dump. Another pile of ore was from the Diamond Mine in Eureka. The ore on the leach pads was from Silverado Mtn. & from the old Silverado Mine dump.

The leach pad operation had been there for 3 years. The operator said they were getting a good recovery. Paula Oliver of the Diamond Mine assay office in Eureka, can supply geochem information & recovery results.

Russ Horton was not aware of any recent drilling in the district but he thought that Galli Mining had drilled a half dozen holes near the Silverado Mine.

Mars mining had worked the S. side of the Alabama Hills (see S. Alabama Hills property description). Altho R. Horton was not clear on who currently ran the operation, he believes SSHK had recently bought it. Their address is SSHK, Inc., 3355 W. Spring Mtn. Rd., Suite 262, Las Vegas, NV 89102.
