

3640 0000
PROPERTY NAME: P-3 Claims (#56)
OTHER NAMES: May core, Little Mike & Little Mike extension
MINERAL COMMODITY(IES): Mercury ?
TYPE OF DEPOSIT: Quartz vein in meta seds
ACCESSIBILITY: See topo sheet
OWNERSHIP: John D. Wood, Winnemucca, NV
PRODUCTION: None.
HISTORY: Claims staked June 1984. Older workings present before this claim group was staked.

County: Humboldt (131) Hem 8
Mining District: Poverty Peak
AMS Sheet: McDermitt
Quad Sheet: Hot Springs Peak 15'
Sec. SE/4, 34 T 41N R 40E
Coordinate (UTM):
North 4 5 8 1 6 7 5 m
East 0 4 6 2 7 5 0 m
Zone 11

DEVELOPMENT: Furtherest east workings - inclined shaft approximately 50 feet deep, open trends N65°W - 48°. Approximately 200 feet to west is another inclined shaft, open approximately 50 feet deep, trends N55°W, -70° small pit between these two shafts. These workings are on
ACTIVITY AT TIME OF EXAMINATION: None. (continued.....)

GEOLOGY: Milky white Fe stained quartz vein in meta seds - phyllitic shale & meta sandstone.

continued from development:

top of a ridge and sunk in a white Fe stained quartz vein approximately 1 foot wide, strikes N50°E, dips 73°NW Two more shafts approximately 150 feet west of above - one on or just off ridge line to south & one below it approximately 100ft. on north side of gully. Upper most shaft approximately 30 feet deep; lower shaft approximately 50 + feet deep. All sunk on white Fe stained quartz vein. Two small pits & a shaft approximately 25 feet deep next to road. All prospect a white quartz vein.

REMARKS: Sample #2454.
Sample #2455. Old prospect pit in metaseds. Maybe along strike from #2454?
UTM: #2455 - North 4583000 - East 0463950.
