Mercury---Nevada
Turellis-Red Ant Claim
Poverty Peak Area.

(137)

ITEM 14

Examined on April 11, 1941, were four claims belonging to Mr. Frank Turellis, and located in the Poverty Peak district, adjacent to the old Cahill property in Humboldt Co., Nevada. Whereas Mr. T. has four claims, one claim, namely the Red Ant, appears to have possibilities. Additional work will be required to evaluate the other three, which at first glance appear to be not extraordinary. Mr. T appears to be on the same structure that feeds the Cahill ore bodies. Isolated spots of high grade cinnabar have been developed in limestone, but work has been insufficient to prove continuity or reserves. Mr. T. Demanded \$100,000 for his property.
