DEVELOPMENT: Staking, geochem, drilling?ACTIVITY AT TIME OF EXAMINATION: Unknown

GEOLOGY: Small amounts of fluorspar associated with several northwestward trending zones of quartz strings in dolomite Papke (1979). Sampling was from jasperoid outcrops in the NE corner of section 9. The jasperoid was highly brecciated, iron-stained with abundant silicification. Sample 1992 was anomalous in Au .05ppm and arseinic 310ppm and minor Zn and Sb.
