

3750 0024

NEVADA  
PERSHING COUNTY

Vanderburg 1936

PLACERITOS DISTRICT

RABBIT HOLE DISTRICT

These placer districts lying west of Majuba, south of Scossa and Sulphur, are described in some detail. Descriptions are not too encouraging despite the lateral extent of the placers, and also the fact that beside the gold described by Vanderburg, they were highly publicized in 1942-1943 because of the stream tin found in the gravels.

For complete detail refer, if and when interested to this I.C. 6902, in the library.
