

3810 0007

PROPERTY NAME: TSS Claims

OTHER NAMES:

MINERAL COMMODITY(IES): Cu oxide on dump

TYPE OF DEPOSIT: vein

ACCESSIBILITY: See topo map

OWNERSHIP: ?

PRODUCTION: Probably none, unknown

HISTORY: ?

(159) Item 10
Lander

County:

Mining District: Ravenswood

AMS Sheet: Millett

Quad Sheet: Gilbert Cr. S.E. 7 1/2'

Sec. Unsured

T R

Coordinate (UTM):

North 4 4 0 2 4 0 0 m

East 0 4 7 7 2 0 0 m

Zone +11

DEVELOPMENT: Two shafts - one inclined one vertical & 2-4 dog holes to the NW of them. Inclined shaft - open trends, tho partially covered with timber. N25°W at - 50°, May be 100 feet of workings. 2) vertical shaft, smaller of the two, open maybe 25-35 feet deep, timbered.

ACTIVITY AT TIME OF EXAMINATION: None.

GEOLOGY: Cu oxide in a dominantly barite vein. Host rock is altered medium-grey-brown limestone. Fair amount of Fe-oxide in rock & vein material.

REMARKS: 1) No sample

2) Picture #2 on camera. Looking So. at inclined shaft in foreground & vertical shaft in background - behind pinyon limb.
