Item # 11

NAME OF PROPERTY

Ajax Group

J. H. Hooper - owner
Rawhide, Nevada

LOCATION

Sunnyside or Regent Mining District, Mineral County, Nevada, about 5 miles south of Rawhide.

GEOLOGY

A scheelite-bearing contact between limestone and granite. While the contact seems to be persistently mineralized, commercial occurrences of scheelite occur only where the limestone has been shattered adjacent to the contact by minor folding and faulting.

DEVELOPMENT

Development work consists of a 100-foot shaft and about 225 feet of drifting and cross-cutting on the 100-foot level. A 20-foot winze has been sunk below the floor of the 100-foot level.

Negligible ore reserves.
