PROPERTYMEN: Silver Queen Mine OTHERAMUS: TWEE OFFERSH: Firthermal Vein ADDESSIBILITY GOOD dirt roads except for the last half mile OWNERS P. CUTTERLY under lease to Inspiration Mining Co. PRODUCTOR: Unknown MINTON: Unknown MINTON: Unknown MINTON: One shaft a 650' crossout and extensive bulldowing. ACTIVITY ATTIME OF EXAMINATION: Mone SECURORY: The Silver Queen shaft was sunk on a N352 striking vein that has a vertical dip and is hosted in a prophyritic latite. The voin has been exposed to the northerast of the sheft by series of dozen-outs along a road. A 650' crossout showyeary little wein material suggesting they did not intercept the vain at dapt, although an underground investigation was not made to confirm this. Samples from the shaft (1978) and from the exposed portion of the vein in the road-cut (1977) were anomalous in: AR (1500 and 200ppm) as well as Ba, Sr, Mn, Pb, Zn, Cu, Hg, with lesser MEMBRES: MERCHARMS MERCHARMS MERCHARMS MERCHARMS MERCHARMS MERCHARMS MERCHARMS MERCHARMS ADDRESSEMBLY ADDRESSEMBLY Mone permadical from £2 Mone permadical Mone permadical Mone Steel Pider Act Mone permadical Mone Mountain MERCHARMS MERCHARMS MERCHARMS MERCHARMS ADDRESSEMBLY MONE PIDER Peak 15' See 19 1 28 a 3ER.
