## A DESCRIPTION OF GROUPS OF PATENTED

## MINING CLAIMS OF SPECIAL MERIT OWNED BY THE COUNTIES

By Bernard York, Field Engineer  
Nevada State Bureau of Mines

The data sheets on certain groups of county-owned patented mining claims that show special merit in the writer's opinion have been grouped together, being selected for special description from the general file compiled in the last half of 1939. For the purpose of reference and the mention of special merits, they are grouped into counties and then numbered.

Each data sheet contains as far as possible the following information:

County, Mining District, Name of Claims, Mineral Survey Number, Former Owner, ~~Survey Location,~~ District, and a general description of the Geology and Mineralization, ~~and~~ The following descriptions will serve to identify the ground and give the favorable features.

LANDER

Sheet 9. Reese River or Austin Mining District and in the New York Canyon and Yankee Blade Canyon area about 4 miles N. of Austin. ~~This area~~ (North Silver King), Kling and Kelly claims.

This area contains several small quartz veins which have produced small ore bodies. Much of the area is covered by overburden but trenching in the vicinity of vein intersections may expose small ore bodies of comparatively high grade silver ore.
