(246) Item 12

PROPERTY NAME: Amazon, Fisherman, Knicherbocker PropertyCounty: Nye

OTHER NAMES: \_\_\_\_\_

Mining District: ReveilleMINERAL COMMODITY(IES): Ag, AS, Ba, Cu, Pb, Sb, Zn.AMS Sheet: TonopahTYPE OF DEPOSIT: Pods and silicified zonesQuad Sheet: Reveille 7½'ACCESSIBILITY: Poor roads west of Gila Mine near the crest of the Range.Sec. Unsurv. T 2½N R 51½'OWNERSHIP: Unknown

Coordinate (UTM):

PRODUCTION: Some but the exact amount not knownNorth 4 12 0 9 0 8 1 5 mHISTORY: Properties are a maze of mines and shafts that have been dozed into extinction but date from the 1870's.East 0 15 7 0 9 0 1 0 m

Zone \_\_\_\_\_

DEVELOPMENT: Currently a masze of open-pits and deep trenches without form and no more than 25 feet deep...cut the crest of the range.ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: The old workings and present dozer cuts explored and irregular silicified and high oxidized zone in northeast dipping shear that forms pods up to thirty feet in diameter in carbonate strata. May also include Tertiary volcanic dikes. The shear is totally altered, bleached, iron stained and argillized. The ore is not visible. Sample 2038 was chipped from exposed portions of a pit. Assay values were moderate to low and included Ag, As, Cu, Pb, Sb and Zn. The values were probably low because I didnt know what to look for,
