

NAME OF PROPERTY

3970 0017

(291)

Packard Mine

Item 17

Standard Gold and Silver Mining Company
Frank Margrave, Vice Pres. and Mgr.
470 Court Street
Reno, Nevada

LOCATION OF PROPERTY

Rochester Mining District, Pershing County, Nevada, 10 miles from Oreana.

GEOLOGY

Six replacement type veins along fractures in rhyolite flows adjacent to the andesite dike. Horn silver is the principal mineral found, although some argente also occurs. Horn silver is found at times disseminated through the foliation of the rhyolite schists.

DEVELOPMENT

Developed by numerous shallow shafts and by several adit tunnels. Considerable production in the past from three oreshoots above the 100-foot horizon. Remaining silver mineralization is not of commercial grade.
