306 Junction Street

Grangeville, Idaho 83530

Attention: Al Basler

Dear Al:

Please make standard thin sections from the eight samples (NWRA-6229 through NWRA-6236) enclosed.

The work order needs to be made out to the Rosebud Joint Venture (Newmont Mining Corporation). Newmont will pay the bill, but it gets charged to the Rosebud Mine budget. Please address the invoice to me, care of Charlotte Ballew.

Thank you again for the help.

Sincerely,

Peter A. Mitchell

IDAHO PETROGRAPHICS

306 Junction Street

Grangeville, Idaho 83530

Attention: Al Basler

Dear Al:

Please make standard thin sections from the seven samples (NWRA-6237 through NWRA-6243) enclosed. I would like you to make two sections (as indicated) for samples NWRA-6237, -6238 and -6241. In addition to the thin section, I would appreciate it if you would cut the indicated slab from sample NWRA-6242.

You will notice that several of the samples have smooth, shiny surfaces. These are fault plains or surfaces. If the sample has one of these surfaces, and the indicated thin section crosses the smooth surface, it is very important that you include this "edge" in the thin section. The texture and size of the fragments along the fault plane and within the first 1 to 2 millimeters in from the edge of the rock are very important to the interpretation of the type of fault breccia and its classification. If you have any questions, please call me at (775) 625-5615 or (775) 625-1969 (evenings).

The work order needs to be made out to the Newmont Mining Corporation--Rosebud Joint Venture. Please address the invoice to me, care of Charlotte Ballew.

Thank you again for the help.

Sincerely,

Peter A. Mitchell
Regional Geologist

IDAHO PETROGRAPHICS

306 Junction Street

Grangeville, Idaho 83530

Attention: Al Basler

Dear Al:

Please make two polished thin sections from the enclosed sample. I would appreciate it if you would impregnate the sample with epoxy before you section it. If there is enough of the sample remaining to polish one of its surfaces, I would like to have a polished slab in addition to the polished thin sections. Electrum (and possibly gold) is abundant in the sample.

The work order needs to be made out to the Rosebud Joint Venture (Newmont Gold Company). Newmont will pay the bill, but it gets charged to the Rosebud budget. Address the invoice to me, care of Charlotte Ballew.

If you have any questions or problems, please call me in Winnemucca. I will be here until April 29th. I will only be gone for three days, returning on May 1st.

Sincerely,

Peter A. Mitchell
Regional Geologist
