

4020 0026

PROPERTY NAME: Steigmeyer Property
OTHER NAMES: Gold Shale Claim, Shale Pit Mine
MINERAL COMMODITY(IES): Au, Ag, As, Sb, and W.
TYPE OF DEPOSIT: Referred to as a Carlin Type deposit.

ACCESSIBILITY: About 2 miles southwest of Round Mountain

OWNERSHIP: Western Metals Producers (1971)

PRODUCTION: Small but unknown.

HISTORY: Initial activity began in 1950

County: Nye 247
Mining District: Round Mountain
AMS Sheet: Tonopah
Quad Sheet: Round Mountain 7
Sec. 31, T 10N, R 44E

Coordinate (UTM):
North 4121801010m
East 014192181210m
Zone

DEVELOPMENT: Open-pits

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Margin of a thin thrust in shales, claystone and Zanzibar limestone of Ordovician age. Bedding bears generally N80°E, 70SE. The mineralization is reported to be native gold valued at \$1.50/ton. The ore is hosted in dark-gray to black, thin bedded shales with supergene enrichment. Sample 2053 was taken from along zones of reddish brown hydrothermal alteration. Assays were high in arsenic, with minor shows in copper and lead.
