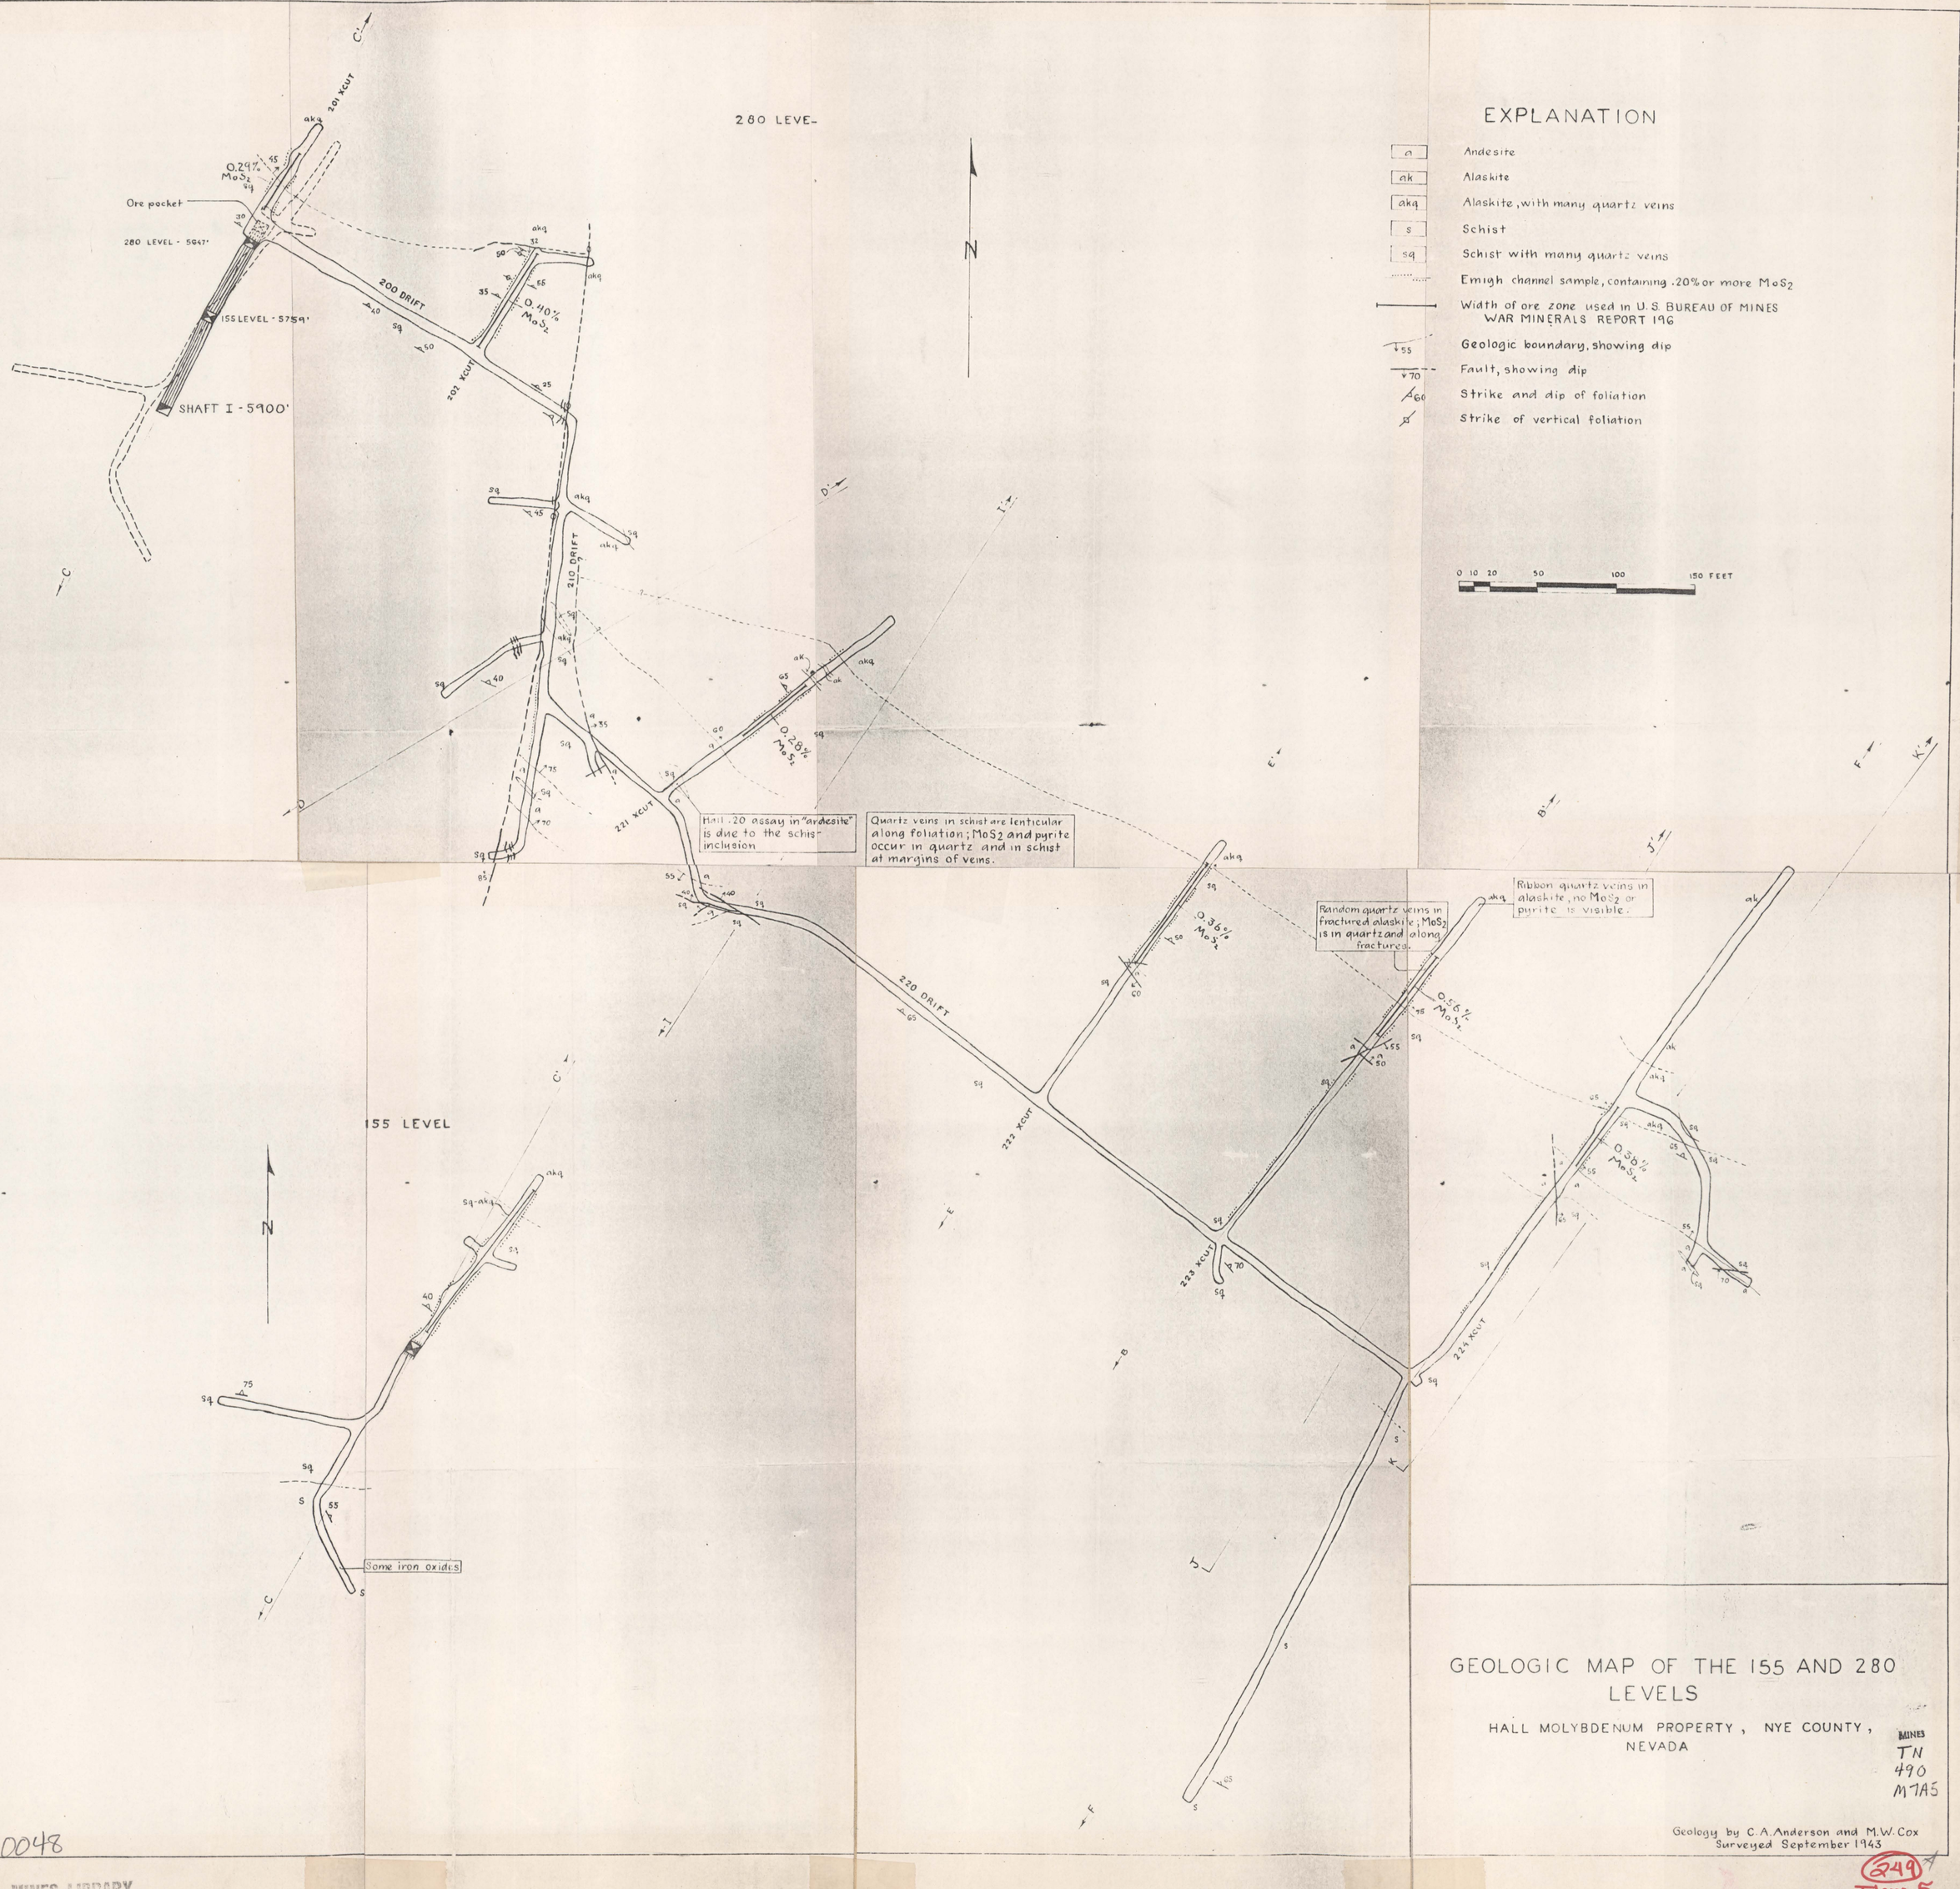
GEOLOGICAL SURVEY

STRATEGIC MINERALS INVESTIGATIONS
PLATE II

GEOLOGIC MAP OF THE 155 AND 280 LEVELS

HALL MOLYBDENUM PROPERTY, NYE COUNTY, NEVADA



EXPLANATION

- a — Andesite
- ak — Alaskite
- akq — Alaskite, with many quartz veins
- s — Schist
- sq — Schist with many quartz veins
- Emigh channel sample, containing .20% or more MoS_2
- Width of ore zone used in U.S. BUREAU OF MINES WAR MINERALS REPORT 196
- Geologic boundary, showing dip
- Fault, showing dip
- Strike and dip of foliation
- Strike of vertical foliation

0 10 20 50 100 150 FEET
