PROPERTY NAME: S.E.D. Claims	Washoe Co. Journa
The state of the s	County: Washoe Itom 4
OTHER NAMES:	Mining District: None
TYPE OF DEPOSIT: Volcanic	AMS Sheet: Lovelock Quad Sheet: Kumiva Peak 15'
ACCESSIBILITY: See Topo map.	Unsurveyed
T B M Accos	Sec, T, R
	Coordinate (UTM): North 4 4 4 7 6 1 1 0 0 m
RODUCTION: None. STORY: Not known. Adits shown on Bonham's Mineral Resource (ap as prospect but no discussion about them in text.	
DEVELOPMENT: Group of claims with two short adits in southern po	rtion.
ACTIVITY AT TIME OF EXAMINATION: None.	
GEOLOGY:Tertiary volcanics, composed mostly of rhyolitic rocks	•
Remarks: (From below) Group of claims staked Oat 1070 H. 1.1	
Remarks: (From below) Group of claims staked Oct. 1979. Hg-sulph and somewhat south. No work has been done on claim group. Sample # 2401 taken @ approximate location of prospect Some SED claims staked March 1984. Southend SED claims: Tin cabin & 2 adits. One slighty 100 feet long. Follows a brecciated quartz vein in meta seds. The contact on North side of vein. Sample 2403 taken here; sample contact on the claim group.	nur area over rise to west as marked on topo map. east of cabin trends N70°l Appears that Tertiary volca e#2401 taken @ north-center
Remarks: (From below) Group of claims staked Oct. 1979. Hg-sulph and somewhat south. No work has been done on claim group. Sample # 2401 taken @ approximate location of prospect Some SED claims staked March 1984. Southend SED claims: Tin cabin & 2 adits. One slighty 100 feet long. Follows a brecciated quartz vein in meta seds. The contact on North side of vein. Sample 2403 taken here; sample claim group. Adit west of Cabin trends S45°E & appears to be in meta Sed. These workings may not be part of the SED claims. There were the sed.	nur area over rise to west as marked on topo map. / east of cabin trends N70°I Appears that Tertiary volce le#2401 taken @ north-center ls. May be 200 feet long.
Remarks: (From below) Group of claims staked Oct. 1979. Hg-sulph and somewhat south. No work has been done on claim group. Sample # 2401 taken @ approximate location of prospect Some SED claims staked March 1984. Southend SED claims: Tin cabin & 2 adits. One slighty 100 feet long. Follows a brecciated quartz vein in meta seds. The contact on North side of vein. Sample 2403 taken here; sample of claim group. Adit west of Cabin trends S45°E & appears to be in meta Sed These workings may not be part of the SED claims. There are two the immediate area. One set in Black P.V.C. pipers the youngare.	nur area over rise to west as marked on topo map. / east of cabin trends N70°I Appears that Tertiary volce le#2401 taken @ north-center ls. May be 200 feet long.
Remarks: (From below) Group of claims staked Oct. 1979. Hg-sulph and somewhat south. No work has been done on claim group. Sample # 2401 taken @ approximate location of prospect Some SED claims staked March 1984. Southend SED claims: Tin cabin & 2 adits. One slighty 100 feet long. Follows a brecciated quartz vein in meta seds. The contact on North side of vein. Sample 2403 taken here; sample claim group. Adit west of Cabin trends S45°E & appears to be in meta Sed These workings may not be part of the SED claims. There are two the immediate area. One set in Black P.V.C. pipe-& the younger is wood posts - Neither set has any paper or marks on them.	as marked on topo map. y east of cabin trends N70°1 Appears that Tertiary volce 1e#2401 taken @ north-center 1s. May be 200 feet long. 1s. other sets of claim posts 1s of the two - the older set
Remarks: (From below) Group of claims staked Oct. 1979. Hg-sulph and somewhat south. No work has been done on claim group. Sample # 2401 taken @ approximate location of prospect Some SED claims staked March 1984. Southend SED claims: Tin cabin & 2 adits. One slighty 100 feet long. Follows a brecciated quartz vein in meta seds. Let up contact on North side of vein. Sample 2403 taken here; sample of claim group. Adit west of Cabin trends S45°E & appears to be in meta Sed These workings may not be part of the SED claims. There are two the immediate area. One set in Black P.V.C. pipe-& the younger is wood posts - Neither set has any paper or marks on them.	as marked on topo map. / east of cabin trends N70° Appears that Tertiary volce e#2401 taken @ north-center s. May be 200 feet long. other sets of claim posts of the two - the older set
Remarks: (From below) Group of claims staked Oct. 1979. Hg-sulph and somewhat south. No work has been done on claim group. Sample # 2401 taken @ approximate location of prospect Some SED claims staked March 1984. Southend SED claims: Tin cabin & 2 adits. One slighty 100 feet long. Follows a brecciated quartz vein in meta seds. Locator: Bruce M. Prior Southwestern Exploration Assoc.	as marked on topo map. y east of cabin trends N70°, Appears that Tertiary volca e#2401 taken @ north-center ds. May be 200 feet long. b other sets of claim posts of the two - the older set
Remarks: (From below) Group of claims staked Oct. 1979. Hg-sulph and somewhat south. No work has been done on claim group. Sample # 2401 taken @ approximate location of prospect Some SED claims staked March 1984. Southend SED claims: Tin cabin & 2 adits. One slighty 100 feet long. Follows a brecciated quartz vein in meta seds. Locator: Sample 2403 taken here; sample of claim group. Adit west of Cabin trends S45°E & appears to be in meta Sed These workings may not be part of the SED claims. There are two the immediate area. One set in Black P.V.C. pipe-& the younger is wood posts - Neither set has any paper or marks on them. REMARKS: Locator: Bruce M. Prior Southwestern Exploration Assoc. 4500 E. Speedway, Suite 14	as marked on topo map. y east of cabin trends N70°. Appears that Tertiary volce e#2401 taken @ north-cente is. May be 200 feet long. y other sets of claim posts of the two - the older set
Remarks: (From below) Group of claims staked Oct. 1979. Hg-sulph and somewhat south. No work has been done on claim group. Sample # 2401 taken @ approximate location of prospect Some SED claims staked March 1984. Southend SED claims: Tin cabin & 2 adits. One slighty 100 feet long. Follows a brecciated quartz vein in meta seds. The contact on North side of vein. Sample 2403 taken here; sample of claim group. Adit west of Cabin trends S45°E & appears to be in meta Sed These workings may not be part of the SED claims. There are two the immediate area. One set in Black P.V.C. pipe-& the younger is wood posts - Neither set has any paper or marks on them. REMARKS: Locator: Bruce M. Prior Southwestern Exploration Assoc. 4500 E. Speedway, Suite 14 Tucson, AZ 85712	as marked on topo map. y east of cabin trends N70° Appears that Tertiary volce #2401 taken @ north-center ds. May be 200 feet long. o other sets of claim posts of the two - the older set
Remarks: (From below) Group of claims staked Oct. 1979. Hg-sulph and somewhat south. No work has been done on claim group. Sample # 2401 taken @ approximate location of prospect Some SED claims staked March 1984. Southend SED claims: Tin cabin & 2 adits. One slighty 100 feet long.
