

NOTE: This map was compiled from a single aerial photographic base, and is uncorrected for photo distortion or scale changes due to the elevation differences between this photo and the entire photographic mission. The claim lines were surveyed with a compass and tape, and may be uncorrected for slope distances. The 2-D Survey lines were surveyed by compass with a 500 foot or 1000 foot cable, and are uncorrected for slope changes.

The following IP Stations are relatively well located ($\pm 20'$) with respect to one another:

LINE 4 Δ 9-LINE 43 Δ 3.5
 LINE 4 Δ 6-LINE 2 Δ 5
 LINE 4 Δ -LINE 5 Δ 4

○ Percussion Hole
 ○ Diamond Drill Hole
