Zone

DEVELOPMENT: One small adit dug by hand and numerous prospects.

ACTIVITY AT TIME OF EXAMINATION: None in the last year.

GEOLOGY: Workings are on a large quartz vein that bears N5°E and dips 70°W. A hand dug adit meanders along the strike the strike of the vein. Ore(?) in the form of large dumps of quartz is stored in front of the adit. Sample 2802 was taken from the vein in the adit. The numerous prospects are along other quartz show on the southside of the mountain.
