JAY P. GRAVES, PRESIDENT

E. M. GOTTSCHALK, SEC. & TREAS.

NEVADA STATE GOLD MINES CO.

MINES LOCATED IN THE SEVEN TROUGHS DISTRICT

MAIN OFFICE:

LOVELOCK, NEVADA

January 22, 1934.

Hon. Noble Getchell
Midas, Nevada.

Dear Senator:

I was delayed in Winnemucca and did not start for the mine as early as anticipated.

On the way up met your truck coming out with 80 boxes. Sorry I was not there as we could have spared you another 20 boxes without embarrassment. Your letter, January 19th, was sent out to me by the truck and received this morning. I do not yet understand why they gave your man but 80 boxes.

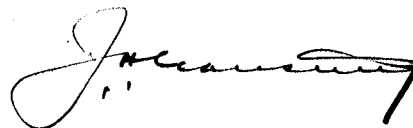

There is no political activity or even interest in this section. Personally I think a serious political mistake would be made to at this time attack an administration that is wonderfully popular and has the people with it almost to a man. Unless some serious and outstanding error is made in the coming few months everything is going Democratic and we can't stop it.

Were I directing the policy of the Republican Party at this particular time I would say keep the organization in tact and make nominations from those who are willing to now sacrifice themselves hoping to later be rewarded. Make no very serious fight, but lay low with the certainty that in due time the errors of Democratic policy will be sufficiently glaring to be attacked with hope of real accomplishment.

I know it is difficult to lay down and wait, but it will bring quicker results than aggressiveness and butting our brains out against a stone wall. Give them all the rope for the time being.

With good wishes, I am

Sincerely yours,

JHG/b
