

4320 0005

PROPERTY NAME: Jupiter Group

OTHER NAMES: _____

MINERAL COMMODITY(IES): Tungsten, Molybdenite, and other sulf.

TYPE OF DEPOSIT: Quartz veins

ACCESSIBILITY: Poor roads to the east of the valley.

OWNERSHIP: Unknown

PRODUCTION: Unknown but could not have been much at best

HISTORY: Unknown

County: Humboldt June 5 (141)

Mining District: Unnamed (Sherman)

AMS Sheet: Mc Dermitt

Quad Sheet: Bloody Run Peak 7 1/2

Sec. 10 T 38N R 37E

Coordinate (UTM):

North 4 5 5 9 0 8 5 m

East 0 4 3 3 8 0 0 m

Zone _____

DEVELOPMENT: Two shallow inclines (less than 20 feet) and minor prospects..no road to either working.

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: The two inclines were sunk by hand on 3-5 foot quartz veins in grano-
diorite. The veins bear N30°W 35°SW and has visable molydenite,
pyrite, galena and reported tungsten which I did not see and was unable
to lamp when I returned Sample 2381 to the lab. These workings are
really pospects along an exposed vein.

Photo's 20 and 21
