

4320 COR4

NEVADA  
HUMBOLDT COUNTY

SHERMAN DISTRICT

On west side of Bloody Run Range, 23 miles north of Winnemucca. Gold discovered in 1922.

BASQUE MINING AND MILLING CO. in 1937 had 12 unpatented claims and  $1\frac{1}{2}$  sections of patented railroad land. In 1930 a 25 ton amalgamation-concentration mill which operated intermittently until 1934. Treated about 800 tons of ore. Leasers were operating property in 1937.

Six adits totalling 5000 feet , the longest adit 700 feet, and other workings.

Slate cut by several nearly parallel diorite dikes. Ore occurs in a veins system that strikes north and south and dips about 65 degrees west. Width of vein material ranges from 4 to 12 feet. Values in gold in a free state in a quartz gangue. Average grade of ore mined in 1937 was \$12.

JUPITER GROUP consisted of two unpatented claims on the west side of the Bloody Run Range. Early day location but no production; An inclined shaft 30 feet deep, two adits and several open cuts, totaling about 150 feet. Small amounts of molybdenite and scheelite are present in two quartz veins that strike north and south and dip 35 degrees east in a granite formation. Average width of veins 5'
