

4390 0043 Coyote Mine

PROPERTY NAME: _____
OTHER NAMES: _____
MINERAL COMMODITY(IES): _____
TYPE OF DEPOSIT: _____
ACCESSIBILITY: Just north of the Coyote Road about 7 miles west of
Silver Peak.
OWNERSHIP: _____
PRODUCTION: _____
HISTORY: _____

County: Esmeralda
Mining District: Silver Peak
AMS Sheet: Goldfield
Quad Sheet: Silver Peak 15'
Sec. 15, T 2S, R 38E
Coordinate (UTM):
North 4 11 18 10 13 15 0 m
East 0 14 13 16 10 17 0 m
Zone +11

DEVELOPMENT: Old shafts, remnants of a mill, fair but steep roads and some prospects.

ACTIVITY AT TIME OF EXAMINATION: Staking, road building and drilling.

GEOLOGY: The Coyote Mine and nine other shafts and adits are on the margin of the Cambrian/
Paleozoic sediments largely limestone/siltstone and the Miocene volcanic sediments, with
Quartz/calcite veins that have been mined and milled locally. (Photo #14 and Sample #1138).
The sample was collected from several dumps in the upper workings in Section 15. The
surrounding area is completely staked, and a gold mill plant is in operation at the bottom
of the hill near Coyote Spring.

Photo #15 is the Foote Mineral evaporative ponds east of Silver Peak. The lithium
evaporite operation is the largest of its kind in the world.

REMARKS: Sample 1138
