This property is located about 5 miles S 60 W from Sodaville, Esmeralda County, Nevada. It is about a mile and a half from the main wagon road to Tonopah.

This is an old prospect developed about twenty-five years ago. High-grade silver ore is said to have been shipped from this property for treatment at Sodaville.

The country rock is an altered limestone. The main vein varies from 1' to 2' in width, strikes N 60 E, and dips about 85 to the east. It has been developed to a depth of about 175 feet, and for a distance of about 300 feet along the strike. The workings below the tunnel level are not accesable. The accompanying sketch is only approximate as no measurements were taken.

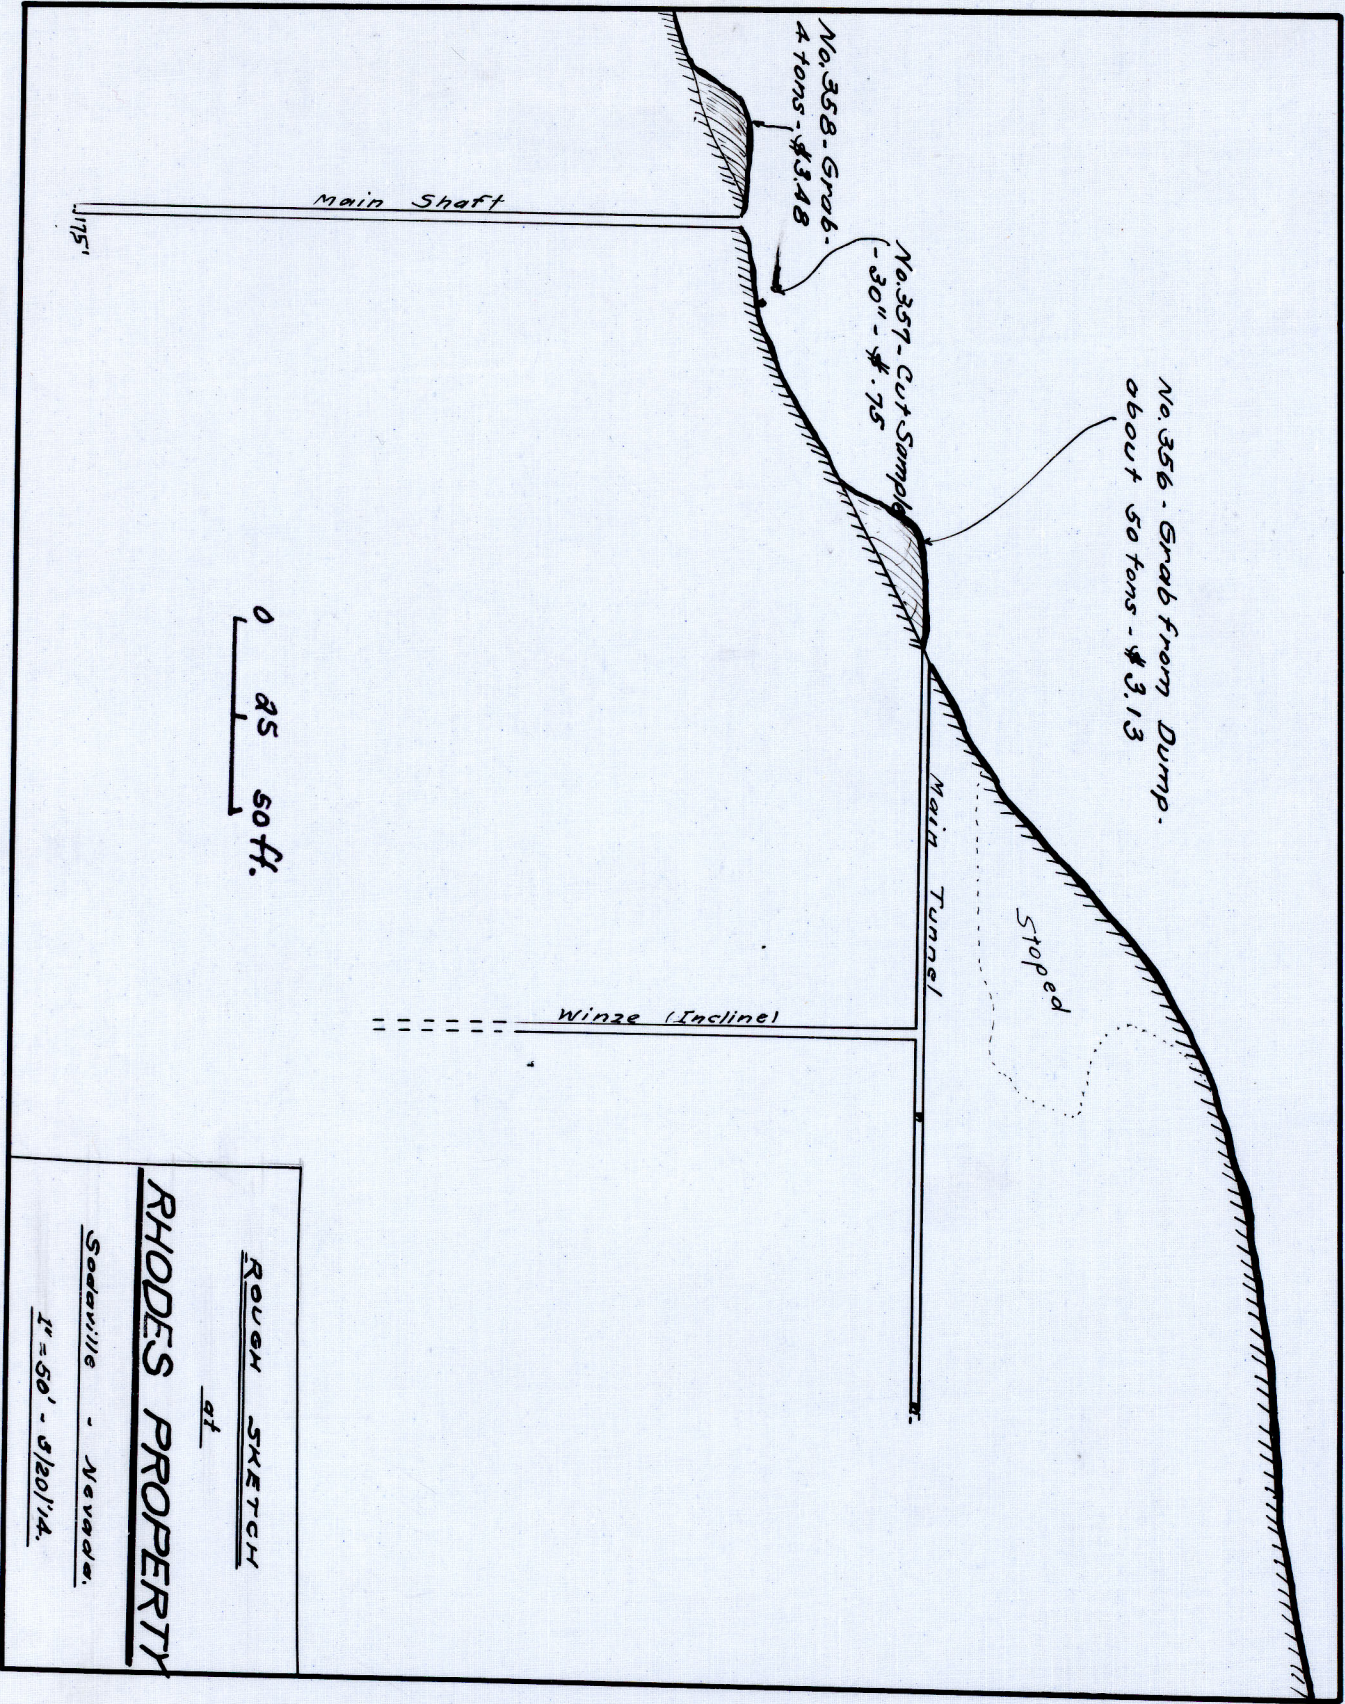

Three samples were taken with results as shown as the sketch. The value is practically all silver.

There are two claims located along the strike of the vein. No terms were asked.

Conclusions.

This is a poor prospect.

0 25 50 ft.
