

4420 0013

250
Item 13

Location: Sec. 3, T. 1 N., R. 49 E.

250

County: Nye

Commodity: Gold

Production: None reported

Geology: Free milling gold is reported to occur in vein and shear zones in rhyolite. Assays are reported to range between \$2 and \$250 per ton with a large percentage between \$10 and \$70 [\$20.67(?) per ounce Au].

Development: The workings include a shallow shaft (50 feet) with drifts on two levels plus a 218-foot adit with drifts.

Periods of Activity: The claims were explored between 1929 and 1934.

References: Cornwall (1972, p. 37); Kral (1951, p. 54).

118p = ^{\$6}17.70
