

4440 0008

(251) Item 8

PROPERTY NAME: Sample Site 2793
OTHER NAMES: Unnamed incline (prospect)
MINERAL COMMODITY(IES): Au/Ag?
TYPE OF DEPOSIT: Gossan like vein system
ACCESSIBILITY: No road to sight mile north of
main workings
OWNERSHIP: Unknown
PRODUCTION: None
HISTORY: Unknown

County: Nye
Mining District: Silverton
AMS Sheet: Tonpah
Quad Sheet: Lockes 7½'
Sec. 26, T 8N, R 54E

Coordinate (UTM):
North 4 2 6 4 8 0 0 m
East 0 5 9 8 3 6 5 m
Zone

DEVELOPMENT: A single shallow incline and prospect.

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Two shallow prospects (10 feet) on a N5°W 70°NE gossan like 4-6 foot vein in limestone. Approximately one mile north of the main camp. Sample 2793 was chipped from the vein and consisted of gossan-like material that was strongly hydrothermally altered and partly brecciated

Photo 14 of workings and 15 from the northend of structure.
