

4590 0011

E1-4

NAME OF PROPERTY

Spruce Standard Mine

Milton Badt et al - Elko, Nevada - owner

77

Item 11

LOCATION

On west slope of Spruce Mountain, Elko County, Nevada.

GEOLOGY

Northwest trending limestone cut by northeast trending fissure, and numerous faults. Small lenses of low grade oxidized lead-silver ore occur at fissure intersections.

DESCRIPTION OF WORKINGS

Incline shaft, 65° SE, sunk on main fissure. 400 feet of drifting on the first, 165 foot, level. Two small stopes were developed. Assays of portions remaining averaged 5.4 ozs. ag, 8% Pb, and 0.3% Zn.

Water stands just above the 265 foot level. No present or potential ores estimated.
