NAME OF PROPERTY

Spruce Standard Mine

Milton Badt et al - Elko, Nevada - owner

LOCATION

On west slope of Spruce Mountain, Elko County, Nevada.

GEOLOGY

Northwest trending limestone cut by northeast trending fissure, and numerous faults. Small lenses of low grade oxidized lead-silver ore occur at fissure intersections.

DESCRIPTION OF WORKINGS

Incline shaft, 65° SE, sunk on main fissure. 400 feet of drifting on the first, 165 foot, level. Two small stopes were developed. Assays of portions remaining averaged 6.4 oss. ag, 8% Pb, and 0.3% Zn.

Water stands just above the 265 foot level. No present or potential ores estimated.
