DEVELOPMENT: _____

ACTIVITY AT TIME OF EXAMINATION: Property not examined, but in Aug, 1973, two men were working the deposit with bulldozersGEOLOGY: Bedded cherts of the Ordovician Vinini Fm. are in contact with a quartz porphyry stock. The chert contains thin fissures of turquoise. Rock assays from the claims indicate gold mineralization also.REMARKS: According to USGS Map I-667, the mine is located within a stock of monzonite porphyry.REFERENCES: BLM report, NE 9-4EXAMINER: BentzDATE VISITED: N/A
