(103)
item 8

Enterprise mine - SW 1/4, Sec. 26, T. 7 S., R. 41 E., Tokop District.

N. 60-70° W. vein system.

The main shaft is an incline on a 20-30° NE dipping fault zone with quartz veinlets. Pyrite noted in quartz.

Gold mine - remains of an old mill.

The wallrock is purple and brown pre-Cambrian Wyman Formation (hornfels and phyllites)

The area is large pendant of Wyman in a porphyritic quartz monzonite.

Recent bulldozing in area. The mine has not been worked for many years.

Brief examination: L. Garside

H. Bonham
