

4820 0011

PROPERTY NAME: Wylie Green Mine
OTHER NAMES: Copper King Mine
MINERAL COMMODITY(IES): Sulfides and Contact minerals
TYPE OF DEPOSIT: Contact

ACCESSIBILITY: Good dirt road north of highway 272

OWNERSHIP: Unknown

PRODUCTION: Some tungsten and gold

HISTORY: _____

County: Esmeralda 1/16

Mining District: Gold Mt (Tokop)

AMS Sheet: Goldfield

Quad Sheet: Ubehebe 15'

Sec. _____, T 8S, R 42E

Coordinate (UTM):

North 4112116000 m

East 04748000 m

Zone 11

DEVELOPMENT: Several underground adits not accessible because of locked doors
two surface structures and an ore-bin

ACTIVITY AT TIME OF EXAMINATION: None in the last several years

GEOLOGY: The workings are on the southside of Gold Mt near a contact between
the siltstone of the Wyman Formation of Cambrian age and a Qtz diorite. The
sample 1953 was not taken from the contact zone so the anomalous tungsten
was not sampled. The contact zone within the diorite was sampled along with
the quartz and found to be high in Ag, As, Cu, Pb, Mn, Sb, Zn, and 2.0ppm Au.
