(254) Item 51

PROPERTY NAME: Midway Mine  
OTHER NAMES: \_\_\_\_\_  
MINERAL COMMODITY(IES): \_\_\_\_\_  
TYPE OF DEPOSIT: Vein  
ACCESSIBILITY: Fifteen miles NE of Tonopah on the west  
side of Highway 8A  
OWNERSHIP: Unknown  
PRODUCTION: Unknown  
HISTORY: Unknown

County: Nye  
Mining District: Tonopah  
AMS Sheet: Tonopah 7 1/2'  
Quad Sheet: Tonopah 15'  
Sec. 31, T 5N, R 44E  
Coordinate (UTM):  
North 4 2 3 2 7 5 0 m  
East 0 4 9 2 1 0 5 m  
Zone \_\_\_\_\_

DEVELOPMENT: A shaft and prospects

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: The shaft was sunk in gray, thin-bedded limestone of Ordovician age. Very little visible mineralization associated with minor quartz veining. Sample 2086 was from the dump and adjacent vein. The vein bears N10E, 50E. A second sample taken from the westside of the hill Sample 2087 came from a prospect along a vein in a fault that bears N40E, 70SE. The second vein was about 2 feet thick and had visible copper oxides. Assay values from Sample 2086 were low but 2087 was anomalous in copper, nickel, chromium, cadmium, vanadium and zinc.
