Quad Sheet: Tonopah 7 1/2'
Sec. 35 T 3N R 42E
Coordinate (UTM):
North 4 2 1 3 4 0 0 m
East 0 4 8 0 4 7 5 m
Zone

DEVELOPMENT: One of the deep shafts of the Belmont Mine property consist of eight patened claims

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: The main shaft was collared in Mizpah Formation on the western most ground of the Belmont Co. Sample 3157 was collected from highly altered and oxidized dumps near the main shaft. The sample was manganese stained quartz with pyrite and other sulfides. This area near Mt Oddie is almost entirely fenced of by Houston Oil and Gas.
