

257 Item 35

4970 0035

PROPERTY NAME: Sample Site 3102

OTHER NAMES:

MINERAL COMMODITY(IES): ???

TYPE OF DEPOSIT: Gossan-like vein

ACCESSIBILITY: About 6 miles of walking a 800 feet of climbing north east of Page Place.

OWNERSHIP: Unknown

PRODUCTION: Unknown

HISTORY: Unknown

County: Nye

Mining District: Tybo (Hot Creek)

AMS Sheet: Tonopah

Quad Sheet: Little Fish Lake 7 1/2

Sec. 22, T 8N, R 49E

Coordinate (UTM):

North 4 2 6 6 1 5 0 m

East 0 5 4 9 0 0 0 m

Zone

DEVELOPMENT: Road to small adit along contact.

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Small adit on a thrust contact that has been hydrothermally altered and intruded by gossan-like mineralization. The area where the workings are is in very steep terrain that has had a road built to it only recently. the contact is highly irregular but trends to the northwest. The contact was followed for 20-30 feet by the adit and Sample 3102 was taken from along the contact.
