

5010 0013

PROPERTY NAME: Sample Site 2960

OTHER NAMES:

MINERAL COMMODITY(IES): Galena, Pyrite, Copper and Au, Ag.

TYPE OF DEPOSIT: Quartz veins

ACCESSIBILITY: Fair improved roads

OWNERSHIP: Lots of claim post but no-paper

PRODUCTION: Unknown but small

HISTORY: Unknown

County: Humboldt

Mining District: Varysville

AMS Sheet: Vya

Quad Sheet: Battle Cr. Ranch 7½

Sec. 6, T 41N, R 28E

Coordinate (UTM):

North 4 5 9 5 4 5 0 m

East 0 3 4 8 3 3 0 m

Zone

DEVELOPMENT: Four adits all caved and very old.

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: The adits north of the Varyville site are similar to those in the south; they are old, shallow and caved. The veins to the north are in strong bull qtz systems with vuggy, cockade structures. Mineralization includes pyrite, galena, and copper. The host rock is granodiorite. Sample 2960 was selected from the dumps in front of the caved adits.

Sample 2960
