PROPERTY NAME: Bartlett Mine

MINERAL COMMODITY(IES): Au, Ag, with minor Pb-Cu

TYPE OF DEPOSIT: Quartz Veins

ACCESSIBILITY: Fair dirt road the last two miles

OWNER: Unknown

PRODUCTION: Unknown

HISTORY: 

DEVELOPMENT: Most of the old workings have been bull-dozed into road or drill sites

ACTIVITY AT TIME OF EXAMINATION: None

GEOLGY: Most of the workings are in a thin veneer of older sediments very near the contact with the younger granites. The intrusive veins are genetically related to the granites which is a pattern for the whole district and carry with them minor Pb-Silver or copper silver mineralization with some gold. St Joseph's held the ground sometime during the last several years.

Sample 2963
