DEVELOPMENT: Several adits, prospects and dozer-cutsACTIVITY AT TIME OF EXAMINATION: Drilling rig on property and several completed holes with additional sites to be drilled.

GEOLOGY: Minor basalt flows cap and area underlain by granodiorite which is cut by copper rich quartz veins in joints and fractures. Some secondary oxides and sulfides of copper including; malachite, azurite, chalcopryite, chalcocite and silver. Mineralization extends over several square miles in prospects and as float along the slopes. The area was prospected by minor trenches and adits. Sample 2954 was from a prospect while sample 2955 was from a dozer-cut and adit. Area staked in 1983 by different people all from Coos Bay Oregon while the driller is from Winnemucca.

Sample 2954 and 2955
