(260) Item 4

PROPERTY NAME: Jim Dandy Prospect

OTHER NAMES: \_\_\_\_\_

MINERAL COMMODITY(IES): Ag (Pb)TYPE OF DEPOSIT: Fissure vein

ACCESSIBILITY: \_\_\_\_\_

OWNERSHIP: \_\_\_\_\_

PRODUCTION: yes.

HISTORY: \_\_\_\_\_

County: NyeMining District: WashingtonAMS Sheet: MilletQuad Sheet: Millet Ranch 15'Sec. \_\_\_\_\_, T 14N, R 42E  
(unsurveyed)

Coordinate (UTM):

North 4 3 2 8 3 0 0 mEast 0 4 7 9 8 5 0 mZone 11DEVELOPMENT: Adit with stopes above to surface; probably 100- 200 mi.ACTIVITY AT TIME OF EXAMINATION: None.

GEOLOGY: The geology and vein mineralogy and vein zoning are essentially the same as the other two properties described at the head of San Juan Creek. The vein is a single 20 cm quartz vein (zoned) which lies at the center of a 1m gouge and breccia fault zone. The fault and vein trend N60W, 85SW. The quartz vein and the fault zone pinches and swells somewhat, and minor rolls were noted (which rake approximately 90°).

REMARKS: Location is between Grand View? and McIntyre? (between two areas of workings shown on 15' topo sheet). No photo or sample.
