Equipment: includes

from the men who

formed it and placed in hands of a committee of stockholders who are seek-  
ing to place it on its feet. One of the men formerly connected with manage-  
ment now under indictment after an investigation into the company's affairs  
by the California State Corp. Com.

**MONO MINERAL CO.**

**CALIFORNIA**

Address: Bray & Fraser, Reno, Nevada.

Holds lease and option on Pittsburgh-Liberty mine, which see.

X **MONO MINING CO. OF NEVADA**

**CALIFORNIA**

Corporate—OFFICE: Niels Buck, 3123 N. Clark St., Chicago, Ill.

MINE ADDRESS: C. T. Eastman, mgr., Sweetwater, Nev. Stock trans-  
ferred and registered at company's office. Annual meeting, 3rd Wednesday  
in January.

Officers: Niels Buck, pres.; A. G. Anderson, v. p.; Alvin E. Stein, sec.;  
Paul Wohlbruck, treas.; with Chas. J. Scholz, Nic Eren, C. W. Lindeberg  
and J. S. Spalding, directors; all of Chicago.

History and capitalization: INC. Feb. 3, 1922 in Nev., as a reorganiza-  
tion of Nevada Progressive Mng. Co., Inc. Property formerly operated by  
the defunct Columbia Cons. Mines Co. and Kentucky Cons. Mines Co. CAP.  
\$2,300,000; \$1 par; increased 1914 by addition of \$300,000 pfd. shares; 1,484,457  
common treasury shares. Bonds authorized, \$300,000; \$164,800 outstanding.

Property: 35 claims (3 patented) and millsite, including Silverado and  
Kentuck mines, in Patterson district, Mono county, 7 miles westerly from  
Sweetwater, Nev., and 60 miles S of Minden, Nev., the nearest shipping point.  
A vein, 2' to 5' wide, in andesite carries argentite with a little gold; value \$15  
to \$40 per ton; shoots of bonanza ore also occur. Early day production \$625,-  
000 and about \$100,000 by Nevada Progressive.

Also 1,000 acres in Lyon county, Nev., near Wellington, of which 400  
acres are said to be mineral-bearing.

Development: by 3 tunnels and inside shaft; the lowest tunnel is 400'  
long and cuts vein at depth of 450'. The inside shaft will be sunk to a depth  
of 500' or 600'. Main tunnel is being driven S on the vein and will be con-  
tinued into the Kentucky mine. Ore reserves: late in 1925 management re-  
ported that both positive and probable ore were estimated at 1,000,000 tons  
of an average of 30 oz. of silver per ton.

Equipment: includes electric power, 2 Fairbanks-Morse 300-h. p. "Y"  
type gas engines, hoist, compressor, storage battery locomotive, 100-ton  
cyanide mill and a 4,400' aerial tramway, connecting mine with mill. Also, an  
hydroelectric power plant on Green creek using two Fairbanks-Morse 180-  
k. w. generators, which can supply an additional 300 h. p.

A new 1,200 cu. ft. Nordberg compressor and 35-h. p. double drum hoist  
were added in 1924. In 1925 company purchased an airplane of the Swallow  
type, capable of carrying 3 passengers. A fairly level piece of ground has  
been secured for landing field.

Comment: company is said to have expended in the neighborhood of  
\$1,000,000 in equipping its property and should secure considerable profits  
from operations.

**MONTEZUMA MINING CO.**

**CALIFORNIA**

Address: Peter Buel, Las Vegas, Nevada.

Property: a group of lead-silver claims, including the Montezuma mine,  
on the slope of San Ysidro Mountain, 6 miles E of Warner and 12 miles N of  
Banner, in Montezuma district, San Diego county. Country rock is much  
faulted limestone and slate. Ore is mainly lead carbonate, with iron oxide and  
decomposed lime; also some galena.

Development: by tunnels, said to have opened large bodies of lead-silver  
ore. It is estimated 150,000 tons of ore are available for extraction in 1925.

Equipment: includes a 50-ton ball mill erected in 1919, but which, it is  
said, is not adaptable to the treatment of the mine run of ore. Shipments are  
being made at the rate of one carload daily; company expects to materially  
increase production in 1926; 18 men employed. Under new management since  
Sept. 1925.

**MOORE MINING CO.**

**CALIFORNIA**

Corporate—OFFICE: Suite 923, Balboa Bldg., San Francisco. MINE

ADDRESS: A. C. Wilson, supt., Jackson, Calif. Annual meeting, in January.

Shoshone county, Ida. 4 1/2 miles SW of Kellogg, adjoining the Nabob. There are 2 parallel veins, 250' apart, in Prichard slate. The ore shoot which has been developed by lessees is 5 to 20' wide and 400' long, and has been followed vertically for over 800'. In early-1928, there were said to be 400,000 tons of ore in reserve, averaging 13% zinc, 8% lead and 3 oz silver per ton but reserves were increased in 1928 and 1929.

DEVELOPMENT: by 6 tunnels, No 1, 550', No 3, 775', No 5, 875', No 6, 1,500' long, and an inclined shaft 512' long; raises and stopes; No 7 is the first shaft level, 800' from the surface.

EQUIPMENT: incl elec power (pur), 538 and 1,170' Ingersoll-Rand compressors, Coeur d'Alene Junior hoist, Waugh sharpener and 4 1/2 mile aerial tramway, from No 5 tunnel portal to Bunker Hill and Sullivan company's mill on Government gulch. Employs 45 men.

PRODUCTION: by lessees, was made in 1921-22-23, that of 1922 said to be worth \$50,000. By Sidney Leasing, Aug, 1925 to Aug, 1926 was 9,000 tons. In late-1926, daily production was over 100 tons per day, which was maintained through 1927-28, except during July 1928 when fire damaged the tramway terminal. Total in 1928 was 29,924 tons, netting \$179,482; and in 1929, 50,000 tons, returns unknown. Production resumed Oct, 1935 and has been continued since by lessee at 90 to 100-ton of ore per day, shipped to Bunker Hill mill, from where zinc concentrates go to the Sullivan Mag Co's electrolytic zinc smelter and the lead to Bunker Hill smelter.

**SIERRA CONSOLIDATED MINES, INC.**—ADDRESS: 419 Ralston St, Reno, Nev; Douglas C McKay, mgr. MINE ADDR: Wellington, Nev; Norman Annett, mine supt, and A B Bliss, mill supt.

OFFICERS: John S Sinai, pres; Geo Morse, v p; Samuel Platt, secy; A P Feeney, treas, directors.

HISTORY: inc Nov 10, 1933; acquired property of Mono Mining Co.

CAPITALIZATION: \$50,000; \$1 par.

PROPERTY: 35 claims (3 pat) and millsite, including Silverado and Kentuck mines, in Patterson district, on the Sweetwater range, at an elevation of 9,000', Mono county, 7 miles westerly from Sweetwater, Nev, and 60 miles S of Minden, Nev, the nearest shipping point. The Silverado-Kentuck vein strikes N 20° E and dips 45° W, between walls of andesite and rhyolite porphyry. Vein is quartz and shattered porphyry carrying argentite, some native silver and a little gold. Ore occurs in shoots up to 10' wide and several hundred feet long, separated by low-grade ore. Lenses of high grade were found along the andesite foot-wall. This ore was sorted and shipped to the Mason Valley smelter in 10-ton lots, as the content was about 5 oz. gold and 800 oz. silver per ton. Mill feed averages about 15 to 30 oz. silver per ton. Early-day production, \$625,000 and about \$100,000 by Nevada Progressive.

Also 1,000 acres in Lyon county, Nevada, near Wellington.

DEVELOPMENT: Silverado mine: by tunnels at 500', 600', 700', 800', 900', and 1,000' levels. The main haulage tunnel is a 900' crosscut driven W to the vein on the 600' level, from which a 1,500' drift was advanced S on the vein cutting an ore shoot at 350', which averaged 4' wide and 600' to 700' long. Also has a 200' 3-comp winze on this level with 700' of drifting at 100' below the collar. The 700' level has 1,000' of drifting cutting a shoot 600' long, and the 800' level has 600' of drifts. The winze will be sunk to a depth of 500' or 600'. Main tunnel driven S on the vein was being advanced 2,200' to the Kentuck mine in 1928.

The Kentuck mine, which is 4,480' S of the Silverado workings and 1,400' higher than the 600' level, is opened by 2 adits driven on the vein 300' below the outcrop, with a 100' winze sunk from the lower level.

EQUIPMENT: 125-ton flotation mill and hydro-electric plant at Green creek, 24 miles from the mine, using 2 Fairbanks-Morse 180-kw generators.

**SIERRA GASTON GOLD MINING CO.**—ADDRESS: 251 Acton Pl, Oakland, Calif; Earl G Bowen.

OFFICERS: E G Bowen, pres; T F McIntire, v p; G S Hanna, sec-treas; T M Foglia, asst sec-treas; directors.

HISTORY: inc in Del. A proposed prospectus was filed by Earl G Bowen on Dec 22, 1934 in relation to a company he called Siskiyou Gold Mng Co; name since changed to above.

CAPITALIZATION: \$500,000; \$1 par. Ann meetg in Sept. Earl G Bowen owns 51% of issued stocks.

FINANCIAL STATEMENT: as of Feb 15, 1937, reported total assets \$1,690,196, incl \$72,651 cash on hand; no current liabilities.

PROPERTY: approx 2,347 acres in Calif and Utah, incl the Gaston mine, 1,172 pat acres in Nevada county, Calif. Approx 180 acres in sections 31 & 32, twp 1, range 12 E, Mt Diablo Base & Meridian, Stanislaus county, Calif. Approx 525 acres in section 36 and 210 acres in Section 31 twp 2S, Range 4 E, Salt-Lake Base & Meridian, Wasatch county, Utah. Also 1/2 interest in Virginia mine, 260 acres pat land in Mariposa county, Calif.

EQUIPMENT: incl 100-ton mill on Gaston prop and 60-ton mill on Virginia prop.

DEVELOPMENT: on Virginia mine by 900' shaft and 500' winze.

ORE RESERVES: the Gaston Mine, 295,120 tons blocked out, estimated to average \$9.64 per ton. Previous workers of Gaston mine milled 174,000 tons valued at \$1,000,000 with gold at \$20.67 price.

**SIERRA GOLD DREDGING CO.**—ADDRESS: Rm 514, 405 Montgomery St, San Francisco, Calif; K G Schwegler, pres-gen mgr. MINE ADDR: Oregon House, Ore; H G Kumble, dredgemaster.

INC: 1934, in Calif.

CAPITALIZATION: \$1,000; no par.

PROPERTY: dredging area in Yuba county, at Oregon House, Calif.

EQUIPMENT: incl elec power, gold placer dredge, 6' buckets. Employs about 15 men.
